

**SPISE ADVICE  
FOR FIELD CROP SPRAYER ADJUSTMENTS  
AND  
SPRAYERS FOR BUSH AND TREE CROPS ADJUSTMENT**

(P. Balsari – A. Herbst – J. Langenakens)

# THE PROBLEM

**EU Directive 128/2009/EC: Farmers have to calibrate/adjust their sprayers**

**Specific equipment may be required**

**Workshop may offer adjustment in addition to inspection**

**No specification of necessary equipment available**

**SPISE advices defining requirements on adjustment equipment**

# **SPISE TWG 6 ACTIVITIES DONE**

- a) Production of the SPISE advice for field crop sprayer adjustments**
- b) Production of the SPISE advice for sprayers for bush and tree crops adjustment**

Standardized Procedure for the Inspection of Sprayers in Europe

# ADVICE

05/2015

compiled by:  
SPISE Technical Working Group 6

## Advice for field crop sprayer adjustments

### SPISE – Standardized Procedure for the Inspection of Sprayers In Europe

Established in 2004 by founding members from Belgium, France, Germany, Italy and the Netherlands, the SPISE Working Group aims to further the harmonisation and mutual acceptance of equipment inspections. In regular meetings, several Technical Working Groups (TWG) prepare advice about the items taken into account by the EU Directive 128/2009/EC but still not considered in the actual ISO/CEN Standards. The present document is intended to provide technical instructions and describes a procedure which is not mandatory but can be voluntarily adopted in the course of inspection or calibration.
