

Fourth European Workshop on

**Standardized Procedure for the Inspection
of Sprayers in Euro
-SPISE 4-**

27 to 29 March 2012 – Lana (Italy)

**New regulation concerning inspection
intervals and exceptions of PAE**

Petr Harašta

Inspection of PAE in CZ

➤ Since 1997 as mandatory

Inspection interval vary between two and three years

new PAE firstly inspected after two years
requirements according EN standards

Directive 2009/128/EC - possibility to improve inspection system but....

Inspection of PAE 2011

Inspected groups of PAE

Field sprayers

Orchard sprayers

Seed treaters

Aerial application equipment

Equipment for application on railway

Inspection interval **three years**

new PAE firstly inspected after two years

Inspection of PAE after SUD implementation

➤ Since 2012 still as mandatory

Field sprayers

Orchard sprayers

Seed treaters

Aerial application equipment

Equipment for application on railway

Hand operated ,...

But interval was extended regardless to a group of PAE –
to **FIVE YEARS**

Requirements

- Act 326/2004 Coll.
- CSN EN 13790 / EN 16122
for field and orchard PAE
- National requirements
for seed treaters, aerial, railway,
- Handoperated, mounted on sowing machines
and other without requirements now
- Additional requirements (national level)

Responsibilities

- State Phytosanitary Administration
- - inspection sites (approval procedure)

Supervision - inspection of PAE

- use of PAE

What about mutual recognition?

Will be a training sufficient,

Inspection report on national view

Exemption of PAE

- Knapsack sprayers and handheld equipment now

Conclusion from CZ

Functional system of inspection is under threat

Inspection sites without possibility for mut. rec. ?

Inspection staff without appropriate training ?

Future is unclear!

Thank you for your attention.
