Closing session

SESSION 1
Inspection of new sprayers before their delivery (TWG 1)
Chairmen: E. Gil, C. Schulze-Stentrop

1. Inspection of brand new sprayers before their delivery shall be considered an option but to be promoted (SPISE WG position).

2. CEMA agree with SPISE position and have start to promote a “CEMA inspection label”

3. Several brand new sprayers present functional defects after their delivering and do not completely fulfil ISO16122 that is less restrictive than the mandatory Machinery Directive requirements (ISO 16199).

Conclusion: **TWG to go forward in preparing SPISE leaflet addressed to farmers about how to know if a brand new sprayer fulfilling Machinery Directive requirements**
SESSION 2
Definition of a common risk assessment procedure for Pesticide Application Equipment (PAE) to be exempted from the inspection (TWG 2)
Chairmen: B. Huyghebaert, N. Bjugstad

Topics discussed:

1. Risk analysis protocol, proposal of SPISE Advice
2. Proposal of Risk assessment protocol
3. Proposal of determination of Scale of use
Listing of subjects addressed to further SWG activities

1. **Determination of the threshold of the Risk Assessment** (risk analysis + risk reduction + residual risk evaluation)

2. **Realization of separate Risk Assessment for the different compartment** (Human Health and Environment) **according to SUD**

3. **Determination of the scale of use.** Definition of a common protocol.

4. **Sharing of the technical and human parts of the risk related to the use of a non-inspected PAE**

5. **Added value of the inspection for small equipment**
SESSION 3
Sprayer inspection harmonised test methods (TWG 3)
Chairmen: J.-P. Douzals, V. Polvêche

1. The right and common interpretation of EN ISO 16122 series seems to be not always easy.

2. This limit the possibility of a PAE inspection “mutual recognition” between MS

3. Necessity to improve ISO16122-4 (same specific sprayers have to be included as their components inspections)

Conclusion: to go forward with a SPISE MANUAL on how to fulfil ISO 16122 inspection protocol and requirements
SESSION 4
“Certification” of the workshop activity (quality assurance) including test facilities (TWG 4)
Chairmen: J. Kole, P. Harašta

1. This aspect has been considered priority for MS mutual recognition and is a priority requirement for “level playing field” for EU Farmers

2. The SPISE Advice on this aspects will include also advice on how to made the workshop audits

Conclusion: Need to continue the development of SPISE advise on how to proceed the quality management system for the complete sprayer inspection scheme
SESSION 5
Harmonise the training of the inspectors to achieve the same professional level of the inspections (TWG 5)
Chairmen: E. Nilsson, H. Kramer, H. Wehmann

1. To have well trained inspector is essential both for the quality of the sprayer inspection and to be able to finalize the mutual recognition process.

2. To be considered also the training of the trainer

Conclusion: SPISE TWG to go head with the draft advice for inspector training
SESSION 6
Present experiences and problems in inspections activities (TWG 6)
Chairmen: E. Gil, H. Kramer, J. Kole

1. Several problems in the inspection activities are present especially in MS without previous experience

2. SPISE TWGs support and SPISE Advice could be contribute to solve those problems

Conclusion: To go head with SPISE Advice and SPISE manual to try to cover same of the existing technical information gaps
SESSION 7
SPISE TWG activities and SPISE advice on PAE not yet considered by harmonised Standards
Chairmen: J. Wegener, T. Bals, P. Balsari

1. Activities done by SPISE TWGs have been presented during all SPISE 6th Workshop

2. Several SPISE TWGs are close to be ready for publish SPISE Advice

**Conclusion:** Go further also with SPISE TWG activities aimed at define SPISE Advice within: TWG 8: Dusters; TWG 9: Microgranulators; TWG 10: Soil fumigation equipment; TWG 11: Foggers and LVM; TWG 12: mobile seeds treatment trying
CLOSING SESSION
2 – General conclusions

1. Most of MS have established PAE inspection scheme

1. Due to the Country specific reality and difficulties not all EU MS will be able to respect the SUD directive PAE inspection deadline

2. Farmers information improvement and technical support to MS seems the main task necessary to improve the PAE inspection activities in EU
4- SPISE WG will improve his activities in these directions also with the support of the TWGs

5 - It is necessary to promote new EN Standard for the several PAE not included in EN/ISO 16119 & 16122 series and probably revise EN/ISO 16122

6 – Improve the exchange of information between Commission and SPISE WG
The SPISE Convenor
Barcelona, 13 September 2016

Prof. Paolo Balsari has been selected as winner of the 2016 SPISE Best Poster Award announced at 6th SPISE Workshop

Angel Jiménez et al.

has been selected as winner of the 2016 SPISE Best Poster Award announced at 6th SPISE Workshop

Barcelona, 13 September 2016

The SPISE Convenor
Prof. Paolo Balsari
All (hopefully) PP presentations will be available in pdf in Spise web site from the end of October.

The SPISE 6th Workshop proceeding with the full papers will be send to all participants by the end of 2016.
Next SPISE TWGs meeting will be held in Sweden on 14-15 December 2016

All of you interested are invited to participate and contribute.
SPISE 7th 2018

SCANDINAVIA (?)

ALL YOU WILL BE INFORMED IN DUE TIME BUT DO NOT FORGET TO TAKE PART OF IT AND REMAIN ACTIVE IN SPISE COMMUNITY !!!
AN OPEN ACCESS PAGE ON SPISE WEBSITE (http://spise.jki.bund.de/) IS ALREADY AVAILABLE FOR QUESTIONS RELATING TO PAE INSPECTION
MANY THANKS TO ALL OF YOU!!
and especially to
Emilio Gil,
Hannes Wehmann
Anna Goutan
UPC, JKI, CMA and
All the organising team !!!!!!
We wish all of you a safety travel back home!!!
